

# Solution1

## R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   :  2.00
## 1st Qu.:12.0    1st Qu.: 26.00
##  Median:15.0    Median : 36.00
##   Mean :15.4    Mean   : 42.98
## 3rd Qu.:19.0    3rd Qu.: 56.00
##   Max. :25.0    Max.   :120.00
```

## Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot. #1 invest = 10000 year = 3 ear = 0.06 total\_asset\_a = invest \* (1 + ear) ^ 3

apr\_q = 0.06 total\_asset\_b = invest \* (1 + apr\_q/4) ^ 12

apr\_m = 0.06 total\_asset\_c = invest \* (1 + apr\_m/12) ^ 36 total\_asset\_c

## answers

a = total\_asset\_a
