Hi Professor Ledoit,

Sorry for the late reply. I was testing everything out yesterday but got busy with support today.

Here are the new instructions for your students:

1. At the E2.14 computer lab, the first two computers on the left side of the front row are reserved for DataStream (look for a sign on the top of the monitor).
2. Log in to one of the two computers with the following username
Username: **mfeds**
Password: **datastream2019**
3. Open Excel and click on the **Thomson Reuters Datastream** tab. Click on the icon labeled **Offline**, and once the status changes to **Online**, all the controls will become available.

4. After you collect the data for your assignments, save your files to on your personal cloud storage (UCLA Box, OneDrive, Google Drive, etc.) or email them to yourself.

That's all. I hope the new workflow helps simplifies things for the students.

Let me know if you have any questions or concerns.

Best regards,
Ats

Dear Ats:

Tomorrow at 8:30am I have a class where I will hand out the first problem set, which involves
DataStream. Do you have a new set of instructions that I can upload to CCLE for my students?

Best,
OL.
