

hw6 (comps)

P/E: Produce a figure with E/P on the y-axis, and (the 3-year average of the) lagged change in percent earnings on the x-axis, one dot for each stock. (Optionally, size the dots by log-firm-cap.) Truncate both X and Y at the 10th and 90th quantiles.

Extra Credit: Scrape [Yahoo!Finance](#) to do it in real-time. You can use an extra 5 pages for this.

Note: In this assignment, it may help to look back on David Aboody's course.
